Introduction

Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magnam aliquam quaerat voluptatem. Ut enim aequale doleamus animo, cum corpore dolemus, fieri tamen permagna accessio potest, si aliquod aeternum et infinitum impendere malum nobis opinemur. Quod idem licet transferre in voluptatem, ut postea variari voluptas distinguere possit, augeri amplificarique non possit. At etiam Athenis, ut e patre audiebam facete et urbane Stoicos irridente, statua est in quo a nobis philosophia defensa et collaudata est, cum id, quod maxime placeat, facere possimus, omnis voluptas assumenda est, omnis dolor repellendus. Temporibus autem quibusdam et.

$$\operatorname{div} \mathbf{A} := \lim_{\Delta v \rightarrow 0} \frac{\oint_S \mathbf{A} \cdot d\mathbf{s}}{\Delta v} \quad (1.1)$$

$$\nabla \times \mathbf{B} = \mu_0 \left(\mathbf{J} + \epsilon_0 \frac{\partial \mathbf{E}}{\partial t} \right) \quad (1.2)$$

The equations above are (1.1) and (1.2). This is Chapter 1 but below is Section 1.1 and below that is Section 1.1.1. This chapter can be found on page 1.

1.1 Test section

Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magnam aliquam quaerat voluptatem. Ut enim aequale doleamus animo, cum corpore dolemus, fieri tamen permagna accessio potest, si aliquod aeternum et infinitum impendere malum nobis opinemur. Quod idem licet transferre in voluptatem, ut.

1.1.1 A section which won't appear in the outline on page III.

Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magna aliqua quaerat voluptatem. Ut enim aequaleamur animo, cum corpore dolemus, fieri tamen permagna accessio potest, si aliquod aeternum et infinitum impendere malum nobis opinemur. Quod idem licet transferre in voluptatem, ut.

1.2 Another test section

Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do.²

Figure 1: A figure with a longer caption. Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magna aliqua quaerat voluptatem. Ut enim aequaleamur animo, cum corpore dolemus, fieri tamen permagna accessio potest, si aliquod aeternum et infinitum impendere malum nobis opinemur. Quod idem licet transferre in voluptatem, ut.

New Chapter with a Long Title that Spanns over More Than One Line

Figure 1: A figure together with another figure.

Figure 2: This figure can have a long caption and still fit if done this way. Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do.

Above Figure 1 is next to Figure 2. By using the `#flexCaption(long caption, short caption)` function you can make flexible captions. You can also make longer/shorter headings! See Chapter 2 on page III.

2.1 New section

$$F_n = F_{n-1} + F_{n-2}, \quad \begin{cases} F_0 = 0 \\ F_1 = 1 \end{cases} \quad (2.1)$$

Table 1: The Fibonacci sequence up to $n = 15$.

F_1	F_2	F_3	F_4	F_5	F_6	F_7	F_8	F_9	F_{10}	F_{11}	F_{12}	F_{13}	F_{14}	F_{15}

A word on Typst referencing

On page 7 you can find links. [1] provides a guide for past LaTeX users on the differences between the two typesetting languages, including what's native or not native, which macros map to which function etc. [2] and [3] links to information on how to cite and reference different sources. Typst includes support for both its native YAML-based format and BibTeX. [4] gives a link to the Typst Universe. On this page you can find packages which aid in your workflow, both in terms of styling and automation. Zap for example is used to make circuit diagrams much like TikZ. [5]

For documentation on all functions, markup- and styling commands, see [6].
